

WU 1: User Registration & Role Selection

Based on authentication and user management.

User: Guest	Name: Account Creation & Profiling
Importance: Very High	Urgency: High
Risk: Medium	Effort (pts): 5

Description: The system must allow new users to create an account by providing personal details: First Name, Last Name, Email (must be unique), Phone Number (9 digits), and Password (min. 8 characters, including 1 number). Crucially, the user must select a **Role Attribute**:

1. **Client:** Default role for booking services.
2. **Business:** Special role that triggers the "Business Setup" wizard. A "Terms of Service" checkbox is mandatory.

UI Sketch:

[LOGO ReserVelo]	
Create Account	
First Name:	[_____]
Last Name:	[_____]
Email:	[_____]
Phone:	[_____]
Password:	[_____]
I want to:	
☒ Book services (Client)	
☐ Offer services (Business)	
☒ I accept Terms and Privacy Policy	
[CREATE ACCOUNT]	

Acceptance Tests:

- Validate Email format (user@domain.com).
- Password field must be masked.
- The "Create Account" button is disabled until required fields are filled and Terms are checked.
- System prevents registration if the email already exists in the database.

WU 2: Business Profile Configuration

Based on data entry forms.

User: Business Owner	Name: Business Details & Service Menu
Importance: High	Urgency: High
Risk: Low	Effort (pts): 8

Description: The owner configures the public profile. **Company Details:** Business Name (max 60 chars), Address, City, and Description (Rich text, max 500 chars). **Service List:** The owner manages a list where each item has:

- **Service Name:** (e.g., "Men's Haircut")
- **Duration:** (Selected in 15-minute increments, e.g., 30, 45, 60 min).
- **Price:** (Currency value, must be > 0).
- **Currency:** (Default: PLN/USD). System checks for duplicates in service names.

UI Sketch:

Step 1: Company Info			
Name: [Barber King]			
Desc: [Best cuts in town...] (0/500)			
Step 2: Services			
Service Name	Duration	Price	Action
Beard T	30 min	40.00	[x]
Full Cut	60 min	80.00	[x]
[+ ADD SERVICE]			
(Modal: Name, Duration Dropdown, Price Input)			

Acceptance Tests:

- Description text counter updates in real-time.
- Price input accepts only numeric values with 2 decimal places.
- At least one service is required to complete the profile setup.

WU 3: Availability Schedule

Based on schedule/program management.

User: Business Owner	Name: Weekly Schedule Definition
Importance: Very High	Urgency: High
Risk: High (Logic)	Effort (pts): 8

Description: The owner sets the "Standard Weekly Hours". For each day (Mon-Sun), the status can be **Open** or **Closed**. If **Open**, two time ranges must be defined:

1. **Start Time** (e.g., 09:00).
2. **End Time** (e.g., 17:00). Optional: **Break Time** (e.g., 13:00-13:30) which blocks slot generation. Constraints: End Time must be later than Start Time.

UI Sketch:

Weekly Availability:		
Monday:	[09:00] to [17:00]	Switch: [ON]
Tuesday:	[09:00] to [17:00]	Switch: [ON]
↳ Break: [12:00] to [12:30]		
...		
Sunday:	[--:--] to [--:--]	Switch: [OFF]
w [SAVE SCHEDULE]		

Acceptance Tests:

- System alerts if the user tries to set "Start Time" after "End Time".
- Saving the schedule regenerates available slots for future dates.
- Existing bookings that fall outside new hours are flagged for manual review (they are not auto-deleted).

WU 4: Service Discovery (Search)

Based on filtering lists.

User: Client	Name: Search & Filter Services
Importance: High	Urgency: Medium
Risk: Low	Effort (pts): 5

Description: A search engine allowing users to find businesses. **Input:** Text field for keywords (Business Name or Service Category). **Filters:**

- **City:** Dropdown list of active cities.
- **Min. Rating:** 1 to 5 stars.
- **Price Range:** Min/Max slider. Results are displayed as **Business Cards** showing: Name, Main Category, Average Rating, and the "Book" button.

UI Sketch:

[Search "Barber"... 🔍] City: [New York ▼]	
Filters: Price: \$0 - \$100 Rating: 4.0+	
Results (3 found):	
 Barber King ★ 4.9 (120)	
"Best cuts..."	
[SEE SERVICES]	

Acceptance Tests:

- Search is case-insensitive.
- Results update dynamically or upon clicking "Search".
- If no results are found, display a friendly "No services found" message.

WU 5: Booking Workflow

Based on event selection.

User: Client	Name: Slot Selection & Confirmation
Importance: Very High	Urgency: High
Risk: High (Concurrency)	Effort (pts): 8

Description: The user views the calendar for a specific service. **Calendar View:** Displays days. Clicking a day loads time slots. **Time Slots:** Generated based on (Business Hours - Existing Bookings - Service Duration). **States:**

- *Green:* Available.
- *Gray:* Booked/Closed.
- *Blue:* Selected. **Summary:** Before submitting, show Service Name, Date, Time, and Total Price.

UI Sketch:

Calendar: [<] FEBRUARY 2026 [>]	
Selected: Feb 14 (Friday)	
Available Slots:	
[09:00] [09:30] [10:00] [XXXXX] [11:00]	
Booking Summary:	
Service: Beard Trim	
Time: Feb 14, 10:00 - 10:30	
Cost: \$40.00	
[CONFIRM BOOKING]	

Acceptance Tests:

- Verify the slot is still free at the moment of clicking "Confirm" (concurrency check).
- Create a database record with status "Pending".
- Send a confirmation email to the user.

WU 6: Booking Moderation

Based on approval workflows

User: Business Owner	Name: Accept/Reject Requests
Importance: High	Urgency: High
Risk: Medium	Effort (pts): 3

Description: A dashboard list of incoming bookings with status "**Pending**". Action Buttons:

1. **Accept:** Changes status to "Confirmed".
2. **Reject:** Changes status to "Rejected". Requires entering a **Rejection Reason** (Text, Optional, max 100 chars). The list should be sorted by **Date (Ascending)** so imminent appointments are top priority.

UI Sketch:

New Requests (2):	
1. John Doe - Full Cut	
Feb 14, 10:00	
[ACCEPT] [REJECT]	
2. Alice Smith – Coloring	
Feb 14, 12:00	
[ACCEPT] [REJECT]	

Acceptance Tests:

- Clicking Accept updates the status immediately.
- Clicking Reject opens a small modal/input for the reason.
- Accepted bookings move to the main calendar view.

WU 7: Client Bookings Management

Based on tracking status.

User: Client	Name: My Visits & Cancellation
Importance: Medium	Urgency: Medium
Risk: Low	Effort (pts): 3

Description: A list view of the client's history. **Tabs:** "Upcoming" vs. "History". **Upcoming Card Attributes:** Business Name, Date, Time, Status (Pending/Confirmed). **Cancellation Logic:** A "Cancel" button is available ONLY if the **Current Time** is < **Appointment Time - 24 Hours**. Otherwise, the button is disabled or hidden.

UI Sketch:

[UPCOMING] [HISTORY]	
Barber King - Feb 14, 10:00	
Status: Confirmed (Green)	
[CANCEL APPOINTMENT]	
Salon Anna - Jan 10, 15:00	
Status: Completed (Gray)	
[RATE SERVICE]	

Acceptance Tests:

- Verify the 24h logic: If the appointment is in 2 hours, "Cancel" is disabled.
- Cancelled bookings change status to "Cancelled by Client"

WU 8: Feedback System

Based on evaluation forms.

User: Client	Name: Service Rating & Review
Importance: Low	Urgency: Low
Risk: Low	Effort (pts): 4

Description: Allows users to rate a **Completed** service. **Fields:**

- **Rating:** Integer scale 1 to 5 (Stars).
- **Comment:** Text area (Min 10 chars, Max 300 chars).
- **Anonymous Toggle:** "Hide my name" (Boolean). Constraint: One review per appointment ID.

UI Sketch:

Rate your visit at "Barber King"	
Score: [★] [★] [★] [★] [☆] (4/5)	
Comment:	
[Great service, but a bit late...]	
[] Post anonymously	
SUBMIT REVIEW]	

Acceptance Tests:

- Submitting updates the Business's average rating score.
- Empty comments (if length < 10) should show a validation error.
- Users cannot rate cancelled or rejected appointments.

WU 9: Business Dashboard (Stats)

Based on reporting.

User: Business Owner	Name: Performance Metrics
Importance: Medium	Urgency: Low
Risk: Low	Effort (pts): 5

Description: A summary view of business performance. **Time Selector:** Dropdown [Current Month / Last Month / Year to Date]. **Key Metrics (KPIs):**

- 1. **Total Revenue:** Sum of prices of all "Completed" bookings.
- 2. **Visit Count:** Count of "Completed" bookings.
- 3. **Pending Requests:** Count of bookings waiting for approval. Data must be strictly filtered by the selected timeframe.

UI Sketch:

Stats for: [January 2026 ▼]			
REVENUE		VISITORS	
\$ 4,200.00		85	
PENDING		3 Requests	

Acceptance Tests:

- Revenue calculation must exclude "Cancelled" or "Rejected" bookings.
- Format currency correctly (e.g., \$ 1,000.00).

WU 10: Password Recovery

Based on security protocols.

User: Any	Name: Secure Password Reset
Importance: High	Urgency: Medium
Risk: High (Security)	Effort (pts): 3

Description: A process to regain access. **Step 1:** User enters Email. **Step 2:** System checks existence. If true, generates a unique **Token** (valid for 60 minutes) and sends a URL via email. **Step 3:** User clicks link, enters New Password and Confirm New Password. **Security Note:** The generic message "If an account exists, an email was sent" must be displayed to prevent email enumeration attacks.

UI Sketch:

Forgot Password?	
Enter your email address:	
[user@example.com]	
[SEND RESET LINK]	

(Email View):	
Click here to reset: [LINK]	

Acceptance Tests:

- Token must expire after 1 hour.
- Used tokens cannot be reused.
- New password must meet the original complexity requirements (min 8 chars).
